PROFILE

Passionate Full-Stack Developer with hands-on experience building and deploying functional web and mobile applications. Fast learner, highly motivated, and eager to contribute to development teams immediately.

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS

Java

Spring Boot

PHP

HTML

CSS

JavaScript

CLOUD & INFRASTRUCTURE

AWS EC2

Cloud Deployment

Server Configuration

CAREER OBJECTIVE

Results-driven Full-Stack Developer seeking opportunities to leverage expertise in Java, Spring Boot, PHP, and cloud infrastructure to deliver high-quality software solutions. Committed to contributing immediately and growing within a dynamic development team.

CORE COMPETENCIES

Responsive Web Development

RESTful API Design

Cloud Deployment (AWS EC2)

Database Architecture

Android App Development

Application Migration

Technical Documentation

Problem Solving & Debugging

PROJECTS

GymFlow System

[View Repo](#)

Java Spring Boot HTML AWS EC2

- Production-ready Gym Management System built with Java and Spring Boot, deployed on AWS EC2.
- Designed robust backend architecture with efficient data management and REST API integration.
- Implemented cloud hosting and server configuration for reliable, always-on availability.

EDUCATION

B.Sc. Computer Science & Software Development

Arab American University
Jenin (AAUP), Palestine

2023 – 2027

◆ Expected graduation: 2027

GITHUB

Bookstore System

[View Repo](#)

HTML

CSS

JavaScript

SQL

- Full-featured online bookstore platform with dynamic product listings and database-driven inventory.
- Implemented responsive UI with clean navigation and efficient search and filtering capabilities.
- Integrated backend data management ensuring accurate stock tracking and order handling.

Student Registration System

[View Repo](#)

Java

Android Studio

XML

SQL

- Android application for student registration featuring multi-screen login flows and activity management.
- Developed complex data management features for course enrollment and student record handling.
- Focused on clean architecture and smooth UX across all device screen sizes.

KEY ACHIEVEMENTS

- Deployed GymFlow System to AWS EC2 — a production-ready application accessible live on the cloud.
- Built 3 full projects published publicly on GitHub demonstrating consistent delivery.
- Migrated web applications to cloud infrastructure, improving reliability and accessibility.
- Developed end-to-end Android and web systems with complete backend and database integration.
